BBA

Biomembranes

Vol. 1065, 1991

Cumulative Contents

Regular Papers

Increased glucose transfer in the rat jejunum after dietary potassium loading: effect of amiloride
C. Capurro, R. Dorr and M. Parisi (Argentina) 1

Lipophilic polylysines mediate efficient DNA transfection in mammalian cells
X. Zhou, A.L. Klibanov and L. Huang (U.S.A.) 8

Muscle lactate transport studied in sarcolemmal giant vesicles
C. Juel (Denmark) 15

Fluorescence properties of angiotensin II analogues in receptor-simulating environments: relationship between tyrosinate fluorescence lifetime and biological activity
R.J. Turner, J.M. Matsoukas and G.J. Moore (Canada) 21

An infrared spectroscopic study of specifically deuterated fatty-acyl methyl groups in phosphatidylcholine liposomes
J. Castresana, J.M. Valpuesta, J.L.R. Arrondo and F.M. Goñi (Spain) 29

Hydrophobic surfaces in oligosaccharides: linear dextrins are amphiphilic chains
C.S. Sundari, B. Raman and D. Balasubramanian (India) 35

Liposomes as models to study the distribution of porphyrins in cell membranes
F. Ricchelli, G. Jori, S. Gobbo and M. Tronchin (Italy) 42

Effects of the 'fusion peptide' from measles virus on the structure of *N*-methyl dioleoylphosphatidylethanolamine membranes and their fusion with Sendai virus
P.L. Yeagle, R.M. Epand, C.D. Richardson and T.D. Flanagan (U.S.A., Canada) 49

Membrane fusion without cytoplasmic fusion (hemi-fusion) in erythrocytes that are subjected to electrical breakdown
L. Song, Q.F. Ahkong, D. Georgescauld and J.A. Lucy (U.K., France) 54

Glucocorticoid-mediated alterations in fluidity of rabbit cardiac muscle microvessel endothelial cell membranes: influences on eicosanoid release
M.E. Gerritsen, S.M. Schwarz and M.S. Medow (U.S.A.) 63

Determination of the thickness of the unstirred layers in the moving-drop method for measuring aqueous-nonaqueous interfacial transport rates
D.M. Miller (Canada) 69

Evidence that interfacial transport is rate-limiting during passive cell membrane permeation
D.M. Miller (Canada) 75

Inhibition of Ca^{2+} accumulation in isolated sarcoplasmic reticulum by thyroid hormones
V. Shoshan-Barmatz and A. Shainberg (Israel) 82

SecY is an indispensable component of the protein secretory machinery of *Escherichia coli*
K.-i. Nishiyama, Y. Kabuyama, J. Akimaru, S.-i. Matsuyama, H. Tokuda and S. Mizushima (Japan) 89

Reports

In vivo tritium contamination effects on water exchange across the erythrocyte membranes: a nuclear magnetic resonance study
I. Petcu, M. Lupu and R. Grosescu (Romania) 99

Evidence for a voltage-gated, non-selective cation channel in the human red cell membrane
P. Christophersen and P. Bennekou (Denmark) 103

Regular Papers

Purification and reconstitution of the high affinity choline transporter
M. Knipper, C. Kahle and H. Breer (F.R.G.) 107

Effect of encapsulated Ca^{2+} on the surface properties of curved phosphatidylcholine bilayers
L.S. Bakás and E.A. Disalvo (Argentina) 114

The interaction of synthetic analogs of the N-terminal fusion sequence of influenza virus with a lipid monolayer. Comparison of fusion-active and fusion-defective analogs
K.N.J. Burger, S.A. Wharton, R.A. Demel and A.J. Verkleij (The Netherlands, U.K.) 121

GTP is required for the integration of a fragment of the *Neurospora crassa* H^+-ATPase into homologous microsomal vesicles
R. Addison (U.S.A.) 130

Formation of large, membrane skeleton-free erythrocyte vesicles as a function of the intracellular pH and temperature
G. Lelkes and I. Fodor (Hungary) 135

The effect of blood serum on the size and stability of phospholipid liposomes
M.N. Jones and A.R. Nicholas (U.K.) 145

Rapid inhibition of the K^+-sensitive phosphoenzyme of Na^+/K^+-ATPase by (*Z*)-5-methyl-2-[2-(1-naphthyl)ethenyl]-4-piperidinopyridine
J. Takada and Y. Fukushima (Japan) 153

Incorporation of synthetic peptide helices in membranes of tetraether lipids from *Thermoplasma acidophilum*. A calorimetric study
D. Blöcher, H.-J. Freisleben, G. Becker, G. Jung and K. Ring (F.R.G.) 160

Line defects in gel phase lipid monolayers
D.A. Pink, K. Farrell, G. MacNeil and E. Sackmann (Canada, F.R.G.) 167

Quantification of Ca^{2+}-ATPases in porcine duodenum. Effects of $1,25(OH)_2D_3$ deficiency
J.A.H. Timmermans, R. Kaune, R.J.M. Bindels and C.H. Van Os (The Netherlands) 177

The isoelectric point of the human red cell glucose transporter
A.-K. Englund and P. Lundahl (Sweden) 185

Isolation and partial characterization of the human erythrocyte band 7 integral membrane protein
C.M. Hiebl-Dirschmied, G.R. Adolf and R. Prohaska (Austria) 195

Hydrophobic membrane thickness and lipid–protein interactions of the leucine transport system of *Lactococcus lactis*
G. In 't Veld, A.J.M. Driessen, J.A.F. Op den Kamp and W.N. Konings (The Netherlands) 203

Significance of γ-glutamyltranspeptidase in exocrine pancreatic amino acid transport
J. Sastre, J.H. Sweiry, K. Doolabh, J. Viña and G.E. Mann (U.K., Spain) 213

Interaction of non-enveloped plant viruses and their viral coat proteins with phospholipid vesicles
R.B. Spruijt, M.R. Böhmer, J. Wilschut and M.A. Hemminga (The Netherlands) 217

Incorporation of exogenous phosphatidylcholine in the plasma membrane of MDCK cells by a specific transfer protein
P. Zlatkine, E.H. El Yandouzi, J.A.F. Op den Kamp and C. Le Grimellec (France, The Netherlands) 225

Kinetic characterization of the reconstituted carnitine carrier from rat liver mitochondria
C. Indiveri, A. Tonazzi, G. Prezioso and F. Palmieri (Italy) 231

Energetic coupling of Na-glucose cotransport
J.J. Centelles, R.K.H. Kinne and E. Heinz (F.R.G.) 239

Early response of cultured lepidopteran cells to exposure to δ-endotoxin from *Bacillus thuringiensis*: involvement of calcium and anionic channels
J.-L. Schwartz, L. Garneau, L. Masson and R. Brousseau (Canada) 250

Omeprazole and bafilomycin, two proton pump inhibitors: differentiation of their effects on gastric, kidney and bone H^+-translocating ATPases
J.P. Mattsson, K. Väänänen, B. Wallmark and P. Lorentzon (Sweden, Finland) 261

Rapid Report

Changes of the subsarcolemmal Na^+ concentration in internally perfused cardiac cells
F.V. Bielen, H.G. Glitsch and F. Verdonck (Belgium) 269

Author Index 275
